EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Kowert on February 4, 2008.

The application has been amended as follows:

Claim 33, line 5, **after** "defining" **insert** "and storing".

2. The following is an examiner's statement of reasons for allowance: The claims are allowable for at least the following reasons: The cited claims detail nodes of a shared object including forward direction pointers encoded therein with a respective counter such that forward and reverse direction operations on the shared object increment and decrement the counter atomically as the nodes of the shared object are traversed. None of the cited prior art of record teach the cited functionality. The references allude to performing reference counting with traversing nodes, but the counter is not encoded integrally with the pointer such that the traversing increments and decrements the counter of the pointer. Therefore, the claims are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
